# TALLGRASS

FACTSHEET 5

O N T A R I O

Ontario Tallgrass Prairie and Savanna Association

## For more Information

For more information on tallgrass prairies and savannas and conservation efforts, contact Tallgrass Ontario. Tallgrass Ontario is a not-for-profit organization whose role is to direct and assist with the recovery of this endangered habitat. The organization has representatives from government, conservation groups, and other interested organizations and individuals. New members are always welcome.

### Head Office:

This factsheet is one in a series about Ontario's tallgrass prairie and savanna communities. Some of these include:

- #1 Get up, get out and see some tallgrass
- #2 Fire and the prairie
- #3 Identifying tallgrass prairie species
- #4 An owner's guide to managing tallgrass prairie and savanna
- #5 Looking for help?

Burnie the Badger

## Looking for Help?

This factsheet provides answers to frequently asked questions regarding getting involved in tallgrass prairie and savanna recovery projects in Ontario.

### How can I learn about tallgrass projects happening in my area?

Tallgrass conservation projects are happening in numerous communities across southern and northwestern Ontario. Contact Tallgrass Ontario, your local stewardship council, or local naturalist club to find out what is happening in your area (see page 4). Contact the Federation of Ontario Naturalists if you need help locating the nearest naturalist club.

### Where can I visit a native prairie or a restoration project in my region?

A number of native prairie remnants are open to the public and are well worth the visit. There are restoration projects on public land that you can visit, and some on private land that can be visited with permission. Every summer, public walking tours, workshops and restoration work days are held at sites across the region. Contact Tallgrass Ontario or check out their website for a list of sites. Also, read Factsheet #1 in this series titled *Get up, get out and see some tallgrass* for a list of publicly owned prairie and savanna remnant sites.

Prairie white-fringed orchid. Paul Pratt

### How can I learn about how to undertake my own tallgrass restoration project?

The best place to begin is by reading one of the excellent manuals written on the subject (see page 3). *Planting the Seed: A Guide to Establishing Prairie and Meadow Communities in Southern Ontario* is recommended as it was written specifically for individuals and community groups interested in undertaking a planting project in southern Ontario. This manual outlines all the steps involved, provides recommended species lists, and has an extensive section listing additional resources. Copies are available from Tallgrass Ontario.

## Where I can obtain plant material or contract assistance for my tallgrass project?

The Society for Ecological Restoration, Ontario Chapter (SER-Ontario), publishes a directory that lists more than 50 native plant nurseries and seed suppliers, as well as those who provide contract seed collection and growing services. Contact SER-Ontario for details (see page 4).

Prairie plants can be purchased as plugs.  
Kim Delaney

## Where do I find a qualified person to conduct a prescribed burn? Apply herbicide?

The Ministry of Natural Resources and forestry (MNR) holds expertise in all aspects of prescribed burning for tallgrass prairie. In addition, several private companies offer prescribed burn services. Your local MNR district office or the MNR prescribed fire specialist can direct you to the local MNR fire-management office. The fire-management office can provide information on accredited contractors.

Applications of a non-persistent herbicide (e.g. glyphosate) is sometimes required to remove troublesome weeds in the beginning stages of a restoration project. A special license is required to purchase and apply the concentrated

Prescribed burn in Brantford. Donald Kirk

## Where can I obtain financial assistance to help with my community restoration project?

There are several sources of funds to help cover the costs of plant plugs, seed, equipment, contract assistance and so on. Businesses and corporate organizations may be interested in supporting local tallgrass projects. Local community foundations, family foundations and funds may also consider funding environmental projects.

TD/Canada Trust's Friends of the Environment Foundation accepts proposals for restoration projects. The MNR may have grants through their Community Fisheries and Wildlife Involvement Program. Your local conservation authority, naturalist club, stewardship council, or angling and hunting club may be interested in sponsoring, assisting, or providing land for tallgrass restoration projects.

form of this herbicide. Check the local yellow pages under lawn maintenance services or inquire at your local farm supply store to find a qualified herbicide applicator.

Financial contributors usually request acknowledgement.

## How can I help recover tallgrass in Ontario?

In lots of ways! Become a member of Tallgrass Ontario and assist with ongoing conservation and education initiatives. Get your hands dirty and have some fun by getting involved in a tallgrass restoration project near you. Spread the word about this endangered ecosystem and what individuals and groups can do to help recover it.
